WEAR

Subject Index of Volume 223

Abrasion
Scaling relationships for the abrasion of steel by diamondlike carbon coatings, 31
The influence of tip shape in abrasion studied by controlled multi-asperity surfaces, 150
Abrasive wear
Abrasive wear behaviour of SiC whisker-reinforced silicate matrix composites, 79
Abrasive wear of Al alloy–Al_2O_3 particle composite: a study on the combined effect of load and size of abrasive, 131
Al-alloy
Abrasive wear of Al alloy–Al_2O_3 particle composite: a study on the combined effect of load and size of abrasive, 131
$Al_{18}B_4O_{33}$ whisker
The solid particle erosion behavior of $Al_{18}B_4O_{33}$ whisker-reinforced AC4C al alloy matrix composites, 22
Alumina fibre
Wear behaviour of planar-random fibre-reinforced metal matrix composites, 173
Aluminum matrix composites
The solid particle erosion behavior of $Al_{18}B_4O_{33}$ whisker-reinforced AC4C al alloy matrix composites, 22
Atomic force microscopy
Material removal mechanisms of single-crystal silicon on nanoscale and at ultralow loads, 66

Ball bearings
Non-magnetic fluid grinding, 7
Bearings
Transient wear of silicon nitride in lubricated rolling contact, 58
Borosilicate composites
Abrasive wear behaviour of SiC whisker-reinforced silicate matrix composites, 79
Boundary layer
Particle erosion—a new concept of flow visualization and boundary layer investigations of rotating machines at high Reynolds numbers, 110
Boundary lubrication
Transient wear of silicon nitride in lubricated rolling contact, 58
Boundary morphology
Computer image analysis of wear particles in three-dimensions for machine condition monitoring, 157
Brittle-materials
Microripple formation and removal mechanism of ceramic materials by solid-liquid slurry erosion, 93

Carbon nitride coating
Coating thickness effect on surface damage mode transitions for an ion beam assisted carbon nitride coating subject to sliding contact with a spherical diamond, 167
Ceramic
Effects of lubricant rheology and additive chemistry in the wear of Si_3N_4 sliding on steel, 37
Ceramic finishing
Non-magnetic fluid grinding, 7
Ceramics
Microripple formation and removal mechanism of ceramic materials by solid-liquid slurry erosion, 93
Coating thickness
Coating thickness effect on surface damage mode transitions for an ion beam assisted carbon nitride coating subject to sliding contact with a spherical diamond, 167

Deformation
Material removal mechanisms of single-crystal silicon on nanoscale and at ultralow loads, 66
Delayed wear
Transient wear of silicon nitride in lubricated rolling contact, 58
Diamondlike carbon coatings
Scaling relationships for the abrasion of steel by diamondlike carbon coatings, 31

Eccentricity
On the effect of misalignment on the performance of U-type lip seal, 139
EHL
Elastohydrodynamic lubrication of a finite line contact, 102
EP additives
Effects of lubricant rheology and additive chemistry in the wear of Si_3N_4 sliding on steel, 37
Erosion
The solid particle erosion behavior of $Al_{18}B_4O_{33}$ whisker-reinforced AC4C al alloy matrix composites, 22
Erosion, slurry
Microripple formation and removal mechanism of ceramic materials by solid-liquid slurry erosion, 93
Etching
The influence of tip shape in abrasion studied by controlled multi-asperity surfaces, 150

Factorial design
Abrasive wear of Al alloy–Al_2O_3 particle composite: a study on the combined effect of load and size of abrasive, 131
Fibre orientation
Wear behaviour of planar-random fibre-reinforced metal matrix composites, 173
Finite line contacts
Elastohydrodynamic lubrication of a finite line contact, 102
Flow separation
Particle erosion—a new concept of flow visualization and boundary layer investigations of rotating machines at high Reynolds numbers, 110
Friction and wear behaviors
Tribological behaviors of (Ca, Mg)–Sialon under lubricating of polyols, 143

Grinding
Non-magnetic fluid grinding, 7

Hall-effect device
An on-line Hall-effect device for monitoring wear particle in oils, 44

Elsevier Science S.A.

Hydrodynamic lubrication
Effect of surface waviness on the hydrodynamic lubrication of a plain cylindrical sliding element bearing, 1

In-situ observations
Coating thickness effect on surface damage mode transitions for an ion beam assisted carbon nitride coating subject to sliding contact with a spherical diamond, 167
Ion beam assisted deposition
Coating thickness effect on surface damage mode transitions for an ion beam assisted carbon nitride coating subject to sliding contact with a spherical diamond, 167

Journal bearings
Effect of surface waviness on the hydrodynamic lubrication of a plain cylindrical sliding element bearing, 1

Leakage
On the effect of misalignment on the performance of U-type lip seal, 139
Lip seal
On the effect of misalignment on the performance of U-type lip seal, 139
Lubricated wear
Effects of lubricant rheology and additive chemistry in the wear of Si_3N_4 sliding on steel, 37
Lubrication
Tribological behaviors of (Ca, Mg)–Sialon under lubricating of polyols, 143
Lubrication theory
Effect of surface waviness on the hydrodynamic lubrication of a plain cylindrical sliding element bearing, 1

Machine condition monitoring
Computer image analysis of wear particles in three-dimensions for machine condition monitoring, 157
Material removal
Material removal mechanisms of single-crystal silicon on nanoscale and at ultralow loads, 66
Microelectromechanical systems
Material removal mechanisms of single-crystal silicon on nanoscale and at ultralow loads, 66
Microripple
Microripple formation and removal mechanism of ceramic materials by solid-liquid slurry erosion, 93
Minimum film thickness
Elastohydrodynamic lubrication of a finite line contact, 102
Misalignment
On the effect of misalignment on the performance of U-type lip seal, 139

Newton–Raphson method
Elastohydrodynamic lubrication of a finite line contact, 102
Numerical simulation
Numerical investigation of a new protection method of the tube erosion by particles impingement, 50

On-line
An on-line Hall-effect device for monitoring wear particle in oils, 44

Particle composite
Abrasive wear of Al alloy–Al_2O_3 particle composite: a study on the combined effect of load and size of abrasive, 131
Particles impingement
Numerical investigation of a new protection method of the tube erosion by particles impingement, 50
Planar-random composite
Wear behaviour of planar-random fibre-reinforced metal matrix composites, 173
Polyol
Tribological behaviors of (Ca, Mg)–Sialon under lubricating of polyols, 143
Protection method
Numerical investigation of a new protection method of the tube erosion by particles impingement, 50

Rolling contact
Transient wear of silicon nitride in lubricated rolling contact, 58
Rotating disc
Particle erosion—a new concept of flow visualization and boundary layer investigations of rotating machines at high Reynolds numbers, 110

Scaling relationships
Scaling relationships for the abrasion of steel by diamondlike carbon coatings, 31
Scratching
Material removal mechanisms of single-crystal silicon on nanoscale and at ultralow loads, 66
Seal
On the effect of misalignment on the performance of U-type lip seal, 139
Sialon ceramic
Tribological behaviors of (Ca, Mg)–Sialon under lubricating of polyols, 143
SiC whisker
Abrasive wear behaviour of SiC whisker-reinforced silicate matrix composites, 79
Silicon nitride
Transient wear of silicon nitride in lubricated rolling contact, 58
Skew
On the effect of misalignment on the performance of U-type lip seal, 139
Sliding element bearings
Effect of surface waviness on the hydrodynamic lubrication of a plain cylindrical sliding element bearing, 1
Stainless steel counterface
Tribology of UHMWPE tested against a stainless steel counterface in unidirectional sliding in presence of model synovial fluids: part 1, 13
Surface damage mode transitions
Coating thickness effect on surface damage mode transitions for an ion beam assisted carbon nitride coating subject to sliding contact with a spherical diamond, 167
Surface roughness
Computer image analysis of wear particles in three-dimensions for machine condition monitoring, 157
Surface texture
Computer image analysis of wear particles in three-dimensions for machine condition monitoring, 157

Thickness
Optimum multilayer TiN–TiCN coatings for wear resistance and actual application, 119
Three-dimensional wear particle analysis
Computer image analysis of wear particles in three-dimensions for machine condition monitoring, 157
Tip
The influence of tip shape in abrasion studied by controlled multi-asperity surfaces, 150
Transferred layer
Optimum multilayer TiN–TiCN coatings for wear resistance and actual application, 119

Transient wear
Transient wear of silicon nitride in lubricated rolling contact, 58
Tribology
Effect of surface waviness on the hydrodynamic lubrication of a plain cylindrical sliding element bearing, 1
Tribology of UHMWPE tested against a stainless steel counterface in unidirectional sliding in presence of model synovial fluids: part 1, 13
Tube erosion
Numerical investigation of a new protection method of the tube erosion by particles impingement, 50
Tungsten carbide
Optimum multilayer TiN–TiCN coatings for wear resistance and actual application, 119

Ultra-high molecular weight polyethylene
Tribology of UHMWPE tested against a stainless steel counterface in unidirectional sliding in presence of model synovial fluids: part 1, 13

Wear
Material removal mechanisms of single-crystal silicon on nanoscale and at ultralow loads, 66
The influence of tip shape in abrasion studied by controlled multi-asperity surfaces, 150
Wear behaviour of planar-random fibre-reinforced metal matrix composites, 173
Wear mapping
Particle erosion—a new concept of flow visualization and boundary layer investigations of rotating machines at high Reynolds numbers, 110
Wear mechanism
Tribological behaviors of (Ca, Mg)–Sialon under lubricating of polyols, 143
Wear particle deposition
An on-line Hall-effect device for monitoring wear particle in oils, 44
Wear resistance
Optimum multilayer TiN–TiCN coatings for wear resistance and actual application, 119

Zinc–aluminium alloy
Wear behaviour of planar-random fibre-reinforced metal matrix composites, 173
